

Ceren Mihci

Industrial Engineering Student

Bornova, İzmir, Turkey | +90 507 822 32 69 | cerenmihci@gmail.com | [linkedin.com/in/ceren-mihci-1845912a0](https://www.linkedin.com/in/ceren-mihci-1845912a0)

SUMMARY

Industrial Engineering student at Yaşar University on a 100% scholarship, with hands-on project experience in production planning, process improvement, operations research and data analysis. Skilled in building linear programming models (LINGO, Excel Solver), conducting time studies, statistical analysis and engineering economic evaluation. Seeking a summer internship to apply analytical skills to real operations and contribute to operational efficiency.

EDUCATION

Bachelor of Science in Industrial Engineering

Sep 2022 – Present

Yaşar University, İzmir, Turkey

- 100% Scholarship

SKILLS

Technical Skills: Linear Programming, Operations Research, Optimization, Production Planning, Time Study, Work Measurement, Process Improvement, Statistical Analysis, Data Analysis, Engineering Economics (NPW, AEW, IRR)

Software: Microsoft Excel (Solver, Pivot Tables, Data Analysis ToolPak), LINGO, Python

Soft Skills: Analytical Thinking, Problem Solving, Teamwork, Communication, Presentation

PROJECTS

Production Optimization Project (Linear Programming)

May 2025 – Jun 2025

- Formulated and solved production optimization models using LINGO and Excel Solver
- Analyzed resource constraints to support profit maximization decisions
- Applied operations research techniques to real-world production scenarios

Time Study on Makeup Product Packaging

May 2025 – Jun 2025

- Collected cycle time data on a packaging process and applied statistical analysis to the observations
- Calculated normal and standard times using performance rating and allowances
- Identified process inefficiencies and documented the findings in a technical report and presentation

Engineering Economics Analysis

Mar 2025 – Jun 2025

- Evaluated two boiler system alternatives for a hospital using Net Present Worth (NPW), Annual Equivalent Worth (AEW) and Internal Rate of Return (IRR) in Excel
- Recommended the most cost-effective alternative based on a data-driven economic comparison

Startup Business Plan - Wearable Health Device

Apr 2025 – Jun 2025

- Developed a business model canvas and customer segment analysis for a wearable health device concept
- Prepared financial estimations and delivered the pitch presentation in an entrepreneurship-focused academic setting

Vodafone Future Challenge 2025 - Idea Competition

Oct 2025

- Co-developed AirLink, a 5G-enabled drone logistics concept, as part of a team
- Contributed to system architecture, business model design and the pitch presentation

CERTIFICATES

- Next Gen Academy Certificate – SOCAR Türkiye
- Excel Training Program – BTK Akademi

ACTIVITIES

- Sector Days '25 – Vodafone: Sector Shaping the Future, Yaşar University (Mar 2025)
